1. EXECUTIVE SUMMARY

Kimley-Horn and Associates, Inc. (Kimley-Horn) was retained by Lowe's (the "Client") to conduct a Phase I Environmental Site Assessment (ESA) for a 12-acre portion of a larger parent land area comprised of portions of three parent parcels (APN 303-070-007 and portions of APNs 303-030-019 and 303-060-016) located at 3984 Indian Avenue in the City of Perris (City), Riverside County (County), California (referred to herein as the "Subject Property"). The Subject Property consists of an approximately 12-acre undeveloped portion adjacent to an existing Lowe's Distribution Center. This Phase I ESA was performed in general accordance with (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI), 40 CFR Part 312 and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process/Designation E 1527-21* (ASTM Standard Practice E 1527-21). The ESA was conducted under the supervision or responsible charge of Jennifer Steen, Environmental Professional.

The Phase I ESA summary is provided below. Specific details were not included or fully developed in this section, and the Phase I ESA must be reviewed in its entirety for a comprehensive understanding of the results. This report represents our services as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the Subject Property's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after property renovation or development). Further, these services are not to be construed as legal interpretation or advice.

Viability of this report is subject to ASTM E1527-21 Sections 4.6 and 4.8. This Phase I ESA is presumed viable for up to 180 days from the first date the component listed in Section 4.6 of the ASTM Standard Practice E1527-21 were conducted, which is July 10, 2023.

Standard and other historical sources of information suggest that the Subject Property was used for agricultural purposes consisting of row crops in or before 1938. This appears to be the first developed use of the Subject Property. It appears agricultural activities ceased around 1997 when the Subject Property was left as vacant and undeveloped land. The Subject Property has since been left vacant and has only been used for temporary trailer parking for the associated Lowe's Distribution Center.

Current Property Use	Perris Valley Commerce Center Specific Plan – PVCC SP The Subject Property is currently undeveloped, vacant land that is used to temporarily park empty trailers associated with the adjacent Lowe's Distribution Center.

Kimley-Horn has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property located at 3984 Indian Avenue in Perris, Riverside County, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

Recognized Environmental Conditions

A recognized environmental condition (REC) is defined in the ASTM Standard as the presence or likely presence of a hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. Kimley-Horn did not identify any RECs in association with the subject Site.

Historical Recognized Environmental Conditions

A historical REC (HREC), as defined in the ASTM Standard, is a past release of any hazardous substance and/or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria. No known past releases were associated with the subject Site and no HRECs were identified by Kimley-Horn during this investigation.

Controlled Recognized Environmental Conditions

A controlled REC (CREC), as defined in the ASTM Standard, is a REC resulting from a past release of hazardous substances and/or petroleum products in which the regulatory agency has allowed contamination to remain in place at the property which is subject to the implementation of required controls and/or restrictive use. Kimley-Horn has not identified any evidence of CRECs in association with the Subject Property.

Business Environmental Risks

A Business Environmental Risk (BER), as defined in the ASTM Standard, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the use of a commercial

site, and which does not require further investigation to the same degree as a REC. Kimley-Horn did not identify areas of potential concern associated with business environmental risks in connection with the Subject Property during the completion of this Phase I ESA.

2.2 PURPOSE AND SCOPE OF SERVICES

This Phase I ESA was performed in general accordance with (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process/Designation E 1527-21* (ASTM Standard Practice E 1527-21).

The purpose of this Phase I ESA was to evaluate the current and historical conditions of the Subject Property in an effort to identify *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and *historical recognized environmental conditions* (HRECs) in connection with the Subject Property. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, CRECs and HRECs in connection with the Subject Property.

Additionally, this Phase I ESA was designed to assist the client in developing information to identify RECs in connection with the Subject Property as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual, noninvasive reconnaissance of the Subject Property and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-21 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-21, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the Subject Property.

2.3 USER RELIANCE

This Phase I ESA report represents the product of Kimley-Horn's expertise and judgment in the environmental consulting industry. This report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entities: Kimley-Horn and Associates, Inc. (Kimley-Horn); and Lowe's, and their respective successors, assigns, affiliates, and subsidiaries. Kimley-Horn acknowledges that these parties may rely on the contents and conclusions presented in this report. Unless stated otherwise in writing, Kimley-Horn makes no other warranty, representation, or extension of reliance upon the findings of this report to any other entity or third party.

Reliance on the Phase I ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal with Kimley-Horn and Associates, Inc. Standard Provisions and the Phase I ESA report. The limitation of liability defined in the Standard Provisions is the aggregate limit of Kimley-Horn's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Sections 4.6 and 4.8. If the Phase I ESA will be used by a different user (third party) than the user for whom the Phase I ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

2.4 SIGNIFICANT ASSUMPTIONS

Pursuant to ASTM Standard Practice E 1527-21, Kimley-Horn assumes that the information provided by all sources and parties, including the User, is accurate and complete, except where obvious inconsistencies or inaccuracies were identified.

2.5 LIMITATIONS, DEVIATIONS, AND SPECIAL TERMS AND CONDITIONS

There were no deviations from the ASTM Standard during the preparation of this report. Any physical limitations identified during the completion of this report are referenced in Section 4.0.

This Phase I ESA is presumed viable for up to 180 days from the first date the component listed in Section 4.6 of the ASTM Standard Practice E1527-21 were conducted, which is July 10, 2023.

Based upon the agreed-on scope of services, this Phase I ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Title records were not provided during this investigation.
- No interview(s) with the owner or owner representative(s) of the Subject Property.

Based on other available resources, these data gaps are not likely to affect the conclusions of this report and are not significant.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

3. USER PROVIDED INFORMATION

The ASTM Standard defines a User as “the party seeking to use Practice E 1527-21 to complete an environmental site assessment of the Subject Property. A User may include, without limitation, a potential purchaser of Subject Property, a potential tenant of Subject Property, an owner of the Subject Property, a lender, or a property manager.” The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E 1527-21.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the “Brownfield's Amendments”), the User must provide certain information (if available) identified in the User Questionnaire to the Environmental Professional (EP). Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete.

Lowe's owns the Subject Property. Lowe's has completed this Phase I ESA in association with the proposed development of the property. There is no pending real estate transaction.

3.2 RECORDED LAND TITLE RECORDS

A 50-year chain of title search was not conducted for the Subject Property by Kimley-Horn. Furthermore, the User did not provide Kimley-Horn with a 50-year chain of title. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report. As such, this is considered a limiting condition; however, based on the other data reviewed for the Subject Property, it is not considered a significant data gap.

Kimley-Horn was provided with a Preliminary Title Report prepared by First American Title Insurance Company dated December 16, 1999 (**Appendix C**). At the time, ownership was vested in Lowe's. A cancelled Land Conservation Contract was identified in the title report, which is consistent with historical agricultural use of the Subject Property prior to development of the existing distribution center. Easements for utilities and access were noted in the title report. No use limitations or liens were identified.

Kimley-Horn was able to determine the property's obvious first developed use, or back to 1940, whichever is earlier, as required by the ASTM standard. A review of aerial photographs indicates the Subject Property was used for agricultural purposes since at least before 1938 until sometime between 1997 and 2002 when the adjacent property was developed as the Lowe's Distribution Center.

3.3 ENVIRONMENTAL LIENS, ACTIVITY AND USE LIMITATIONS, AND GOVERNMENT INSTITUTIONAL AND ENGINEERING CONTROLS

An Environmental Lien and AUL Search Report for the largest parcel (APN 303-030-019) within the Subject Property was requested of EDR. EDR's Environmental Lien and AUL Search (**Appendix D**), dated July 19, 2023, lists that any record of environmental liens, activity and use limitations, or institutional controls or engineering controls associated with the Subject Property were not found through review of reasonable ascertainable records.

3.4 REASON FOR PERFORMING THIS PHASE I ESA

According to the User, this Phase I ESA was commissioned as part of environmental due diligence related to the potential development of the Subject Property by Lowe's.

4. SITE RECONNAISSANCE

Information contained in this section is based on a visual reconnaissance conducted while walking through the Subject Property and the accessible interior areas of structures, if any, located on the Subject Property. The Subject Property and adjoining properties are depicted on the Site Diagram, which is included in Figure 3 of **Appendix A**. Photo documentation of the Subject Property at the time of the visual reconnaissance is provided in **Appendix B**.

The site observations described below are of a field reconnaissance that took place on July 13, 2023.

The approximately 12-acre Subject Property sits adjacent to an active Lowe's Distribution Center remains mostly undeveloped and is currently being used to temporarily park trailers used by the Distribution Center. There are no permanent structures that currently stand on the property. There is a paved roadway that sits to the north of the property that provides access to an employee parking lot for the Lowe's Distribution Center. The Subject Property is bound by the Lowe's Distribution Center to the west, Morgan Street to the south, and Indian Avenue to the east. The surrounding area is primarily built with industrial use buildings and distribution facilities, with a Ross Dress for Less Distribution Center immediately south and distribution centers for Fallas, Hanesbrands, and Wayfair immediately east across Indian Avenue.

Access to the site is only available through a single access point within the Lowe's Distribution Center Property; fencing surrounds the property on all sides. A gate is located near the center of the west side of the site. Access to the Lowe's Distribution Center is provided to the north with a paved driveway, and arrangements must be made to have access to the property. Ms. Steen and Mr. Douangmala were escorted by Mr. Michael Banks, a Maintenance Manager for Lowe's, who provided ground transportation throughout the property and Lowe's Distribution Center using a company cart. Other than the trees that line the eastern boundary of the property with Indian Avenue, there was no other notable vegetation on the property.

Kimley-Horn did not have access to the trailers that were stored on property, though Mr. Bakes noted that the trailers that were specifically within property boundaries were empty. The doors of many trailers were open, and those that Kimley-Horn were able to observe appeared empty.

An electrical property owned by Southern California Edison was observed approximately 140 feet north of Morgan Street at the southwest corner of the property along Indian Avenue. There was no staining or leaking observed associated with the electrical equipment.

Immediately west of the southern limits of the Subject Property and within the developed portion of the Lowe's Distribution is a water storage tank. The tank holds potable water provide by the municipal water provider. Adjacent to the tank is an approximately 850 SF structure that houses a water pump and backup generator. The generator is engaged if there is a disruption to regular electric service to the pump. There is a 500-gallon AST containing diesel fuel within the structure. The concrete around the tank and structure was stained reddish-orange. According to Mr. Banks, the rust stains occurred during a tank flushing event when water from the tank was released to perform tests and maintenance on the tanks.

A diesel filling station and propane tank storage area is located on the southwest corner of the Lowe's Distribution Center property, outside the boundaries of the subject property.

There were no drums, tanks, pools of liquid, odors, stained soils, or stressed vegetation observed within the property during the site reconnaissance.

Photographs that were taken during the site reconnaissance are located in **Appendix B**.

4.2 CURRENT OPERATIONS

The Subject Property currently consists of undeveloped vacant land that is used to temporarily park empty trailers associated with the adjacent Lowe's Distribution Center.

4.3 ADJOINING PROPERTIES

The following section provides information about the adjoining properties obtained during the Subject Property reconnaissance and through review of reasonably ascertainable information. Visual observations of adjoining properties (from Subject Property boundaries) are summarized below (**Table 4.3**).

Table 4.3 Summary of Adjoining Properties		
Direction	Description	REC/BER
North	A driveway for the Lowe's Distribution Center employee parking lot borders the north boundary of the site, with two catch basins sitting north of the driveway.	No.
East	Indian Avenue borders the east side of the site, with several warehouses sitting on the other side of the street.	No.
South	Morgan Street borders the south end of the property. A Ross Dress for Less Distribution Center sits on the south side of Morgan Street.	No.
West	The Lowe's Distribution Center warehouse sits to the west of site.	No.

4.4 PETROLEUM CONTAINING EQUIPMENT

There was no equipment observed onsite that contains or may contain fuels, lubricating oils, hydraulic oils, or other petroleum products. Outside the limits of the Subject Property and within the Lowe's Distribution Center, there is one 1000-gallon storage tank that sits at the southwest corner used for tugs. A second AST containing diesel is situated within an enclosed structure. There were no observations made that showed evidence of spills, leaks, or damages at and around the location of the tank.

4.5 PCB SURVEY

On-site transformers, capacitors, hydraulic systems, heat systems, heat transfer systems, and battery chargers were inspected for PCB labeling and signs of leakage. One four-compartment cabinet was observed within the limits of the Site. This cabinet likely houses capacitors, which do not typically require the use lubricants. Therefore, PCBs are not considered a business risk at the Site.

4.6 HAZARDOUS BUILDING MATERIALS

The Subject Property is undeveloped; therefore, a Hazardous Building Materials Survey analyzing asbestos, lead-based paint, lead containing materials, and mold was not warranted. Additionally, universal waste such as batteries, lighting, and thermostats were not observed during Site Reconnaissance.

5. RECORDS REVIEW

5.1 PREVIOUS LAND USE

Historical aerial photographs from 1938 to 1989 indicate that agricultural uses, specifically row crops, were present on the Subject Property. The 1997 aerial photograph indicates that agricultural operations ceased, leaving the Subject Property as undeveloped land to present day. The Subject Property has most recently been used for temporary trailer parking.

Geologic Formation	The Site is located in the northern portion of the Peninsular Ranges Geomorphic Province. The peninsular Ranges consist of a series of northwest-southeast oriented fault blocks. The Subject Property is located on the Perris Block. The Perris Block is composed chiefly of granitic rock. It is bound to the east by the San Jacinto Fault, to the west by the Elsinore Fault, and to the northwest by the Santa Ana River. The Subject Property is immediately underlain by Quaternary-age alluvial deposits comprised primarily of sand, and gravel-sand deposits. The alluvium can range from 200 to 2,000 feet thick throughout Moreno Valley. These deposits are underlain by plutonic rocks (hornblende tonalite, granodiorite) of Cretaceous-age. The San Jacinto fault is considered one of the most active faults in Southern California. It is a right-slip fault. The Perris Block has a history of vertical movement on the order of several thousand feet due to the San Jacinto and Elsinore Faults. However, the primary source of seismic activity in the vicinity of the Site is the San Jacinto Fault. The Site is situated within the San Jacinto River watershed. 5.3 HISTORICAL RECORDS REVIEW

Kimley-Horn reviewed reasonably ascertainable records to identify obvious uses of the Subject Property from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. Reasonably ascertainable records reviewed as part of this Phase I ESA documented the use of the property back to at least 1938.

Readily available historical selected historical aerial photographs USGS topographic maps, city directories (at approximately 5-year intervals), and historical fire insurance maps produced by the Sanborn Map Company were requested from Environmental Database Resources (EDR) to evaluate past uses and relevant characteristics of the Subject Property and surrounding properties.

Reviewed historical topographic maps, city directories, and aerial photographs are summarized below. The sources and years reviewed are identified below.

Table 5.2: Aerial Photograph Summary (Appendix F)

Year and Source	Summary of Information
1938 EDR	The Subject Property and surrounding properties appear to be agricultural land, specifically row crops. There is a water basin along the southeastern boundary of the Subject Property. There are additional water basins to the south and east of the Subject Property. There are buildings associated with residential and agricultural use north of the Subject Property.
1949 EDR	The agricultural row crops on the Subject Property and surrounding properties are now divided into different agricultural parcels. There are unpaved roads dividing the parcels; there are unpaved roads running through the Subject Property and along

	the western boundary. There are additional residential and agricultural buildings to the north and east of the Subject Property.
1953 EDR	There is no longer a dirt road running through the northern portion of the Subject Property. No significant changes to the surrounding properties were since the 1949 aerial photograph. There appears to be a basin to the east of the Subject Property.
1961 EDR	No significant changes to the Subject Property were observed since the 1953 aerial photograph. The unpaved road north of the Subject Property is now a paved roadway (known as present-day Ramona Expressway) that connects to a north-south roadway to the east. The surrounding properties remain agricultural land. The water basin located directly south of the Subject Property, seen in the 1938 aerial photograph, appears to be replaced with row crops.
1967 EDR	No significant changes to the Subject Property and surrounding properties were observed since the 1961 aerial photograph. There is an additional building to the northeast associated with agricultural/residential use.
1974 EDR	The 1974 aerial photograph provided by EDR did not depict the Subject Property. Therefore, conclusions regarding the Subject Property cannot be made. However, the photograph indicated that surrounding properties to the south remained as agricultural land.
1978 EDR	No significant changes to the Subject Property and surrounding properties were observed since the 1967 aerial photograph. A residential structure southeast of the Subject Property is no longer seen in the 1978 aerial photograph.
1985 EDR	No significant changes to the Subject Property were observed since the 1978 aerial photograph. There is increased asphalt pavement, paved roadways, and buildings, likely commercial/industrial, south of the Subject Property.
1989 EDR	No significant changes to the Subject Property were observed since the 1985 aerial photograph. There is a water basin directly south of the Subject Property. There are additional paved roads and surface parking lots west of the Subject Property.
1997 EDR	The northern and southern corners of the Subject Property appear to be vacant, undeveloped land and are no longer used for agricultural uses. The middle portion of the Subject Property appears to be unchanged from the 1989 aerial photograph. There are additional residential buildings to the north and south of the Subject Property and additional commercial development (buildings, surface parking lot, roadways) to the north and west. There is a water basin to the north of the Subject Property.
2002 EDR	The Subject Property is entirely vacant, undeveloped, and no longer used for agricultural purposes. Agricultural parcels immediately to the west and north are redeveloped into an industrial warehouse distribution center with associated landscaping, truck yard, surface parking lot, and driveways. The development is consistent with the present day Lowe's Distribution Center. There is additional industrial development (building, surface parking lot, and yard) southeast of the Subject Property. There appears to be grading associated with new development to the south and two water basins, associated with the industrial warehouse, to the north.
2006 EDR	No significant changes to the Subject Property were observed since the 2002 aerial photograph. The grading seen south of the Subject Property in the 2002 aerial

	photograph is now an industrial warehouse building with associated surface parking, truck yard, water basins, and paved roadway.
2009 EDR	No significant changes to the Subject Property were observed since the 2006 aerial photograph. There is plant landscaping surrounding the perimeter of the Subject Property. Industrial development continues to the east with a new warehouse building with associated surface parking immediately east of the Subject Property. There is additional roadway pavement surrounding the Subject Property. It appears agricultural uses to the north, east, and south are now vacant and no longer used for agricultural purposes.
2012 EDR	No significant changes to the Subject Property and surrounding properties were observed since the 2009 aerial photograph. The Subject Property remains vacant and undeveloped. There is additional roadway pavement north of the Subject Property.
2020 EDR	The Subject Property appears to be used to temporarily park trailers associated with the adjacent Lowe's Distribution Center. Temporary storage occurs only on the northwestern corner of the Subject Property.

Table 5.3: Topographic Map Summary (Appendix G)

Year	Summary of Information

1942 EDR	The Subject Property appears to be undeveloped. There are basins and unpaved roads to the immediate east and south of the Subject Property. There is a secondary highway to the north and east.
1943 EDR	No significant changes to the Subject Property were observed since the 1942 topographic map.
1953 EDR	No significant changes to the Subject Property were observed since the 1943 topographic map. There is an increase in buildings, likely residential, water wells, and roadways surrounding the Subject Property. There is a military reservation to the north.
1967 EDR	There are two unpaved east to west roadways that run through the Subject Property.
1973 EDR	No significant changes to the Subject Property were observed since the 1967 topographic map.
1979 EDR	No significant changes to the Subject Property were observed since the 1973 topographic map.
2012 EDR	There are no longer unpaved roads on the Subject Property. The Subject Property appears to be vacant and undeveloped. The surrounding areas show an increase in development, including paved roadways and neighborhoods.

2015 EDR	No significant changes to the Subject Property were observed since the 2012 topographic map.
2018 EDR	There is a roadway that goes through the Subject Property – W Dawes Street shown on the topographic map. Aerial photography does not confirm the presence of the road, however, Dawes Road does exist east of the Subject Property.

Kimley-Horn attempted to review reasonably ascertainable Sanborn Fire Insurance Maps for the Subject Property. EDR searched for available Sanborn Fire Insurance and stated that no coverage was available for the Subject Property. The no coverage letter is included in **Appendix H**.

The city directories used in this study were made available through EDR (selected years reviewed: 1990-2020) and were reviewed at approximate five-year intervals, if readily available (**Appendix I**).

Table 5.4 Historical City Directories Summary

Direction	Description

South	Listings south of the Subject Property are associated with names of residential addresses, Riverside County Selpa, Verda Steel Corp, Bonehead Composites, JRC Engineering, P Town Boxing Academy, Wayfair, Ross Dress for Less, Core & Main Waterworks, SLC Parts, Inc., and Starklite Cycle.
West	Listings west of the Subject Property are associated with names of residential addresses.

City directories indicate the Subject Property was occupied as recently as 2020. There were no RECs identified during the review of the City Directories.

5.4 REGULATORY RECORDS REVIEW

An environmental database search for the Subject Property and the surrounding area was performed by EDR, a contract information services company, using ASTM E1527-21 standard radii. The purpose of the records review was to identify RECs in connection with the Subject Property. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated, and the scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases. A copy of the EDR Database Report is attached in its entirety in **Appendix J**.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the Subject Property. The groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the Subject Property cannot be directly ascertained.

5.4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate Subject Property boundaries. Database definition, descriptions, and the database search report are included in **Appendix J**.

In addition to the above ASTM-required listings, Kimley-Horn reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in **Appendix J**.

5.4.2 Subject Property and Occupant Listings

The Subject Property or its known occupants are identified in the referenced databases researched by EDR (**Appendix J**). The address of the adjacent Lowe's Distribution Center was used to search databases; therefore, the listings are associated with the existing Lowe's Distribution Center. The Lowe's Distribution Center is listed on the following databases:

- RCRA-LQG – RCRA Large Quantity Generators
- AST – Aboveground Petroleum Storage Tank Facilities
- HAULERS – Registered Waste Tire Haulers Listing
- CERS HAZ WASTE – California Environmental Reporting System Hazardous Waste
- CERS TANKS – California Environmental Reporting System Tanks
- CHMIRS – California Hazardous Materials Information Reporting System
- RCRA NonGen/NLR – RCRA Non-Generators / No Longer Regulated
- FINDS – Facility Index System/Facility Registry System
- ECHO – Enforcement & Compliance History Information
- HAZNET – DTSC Facility and Manifest Data
- NPDES – National Pollutant Discharge Elimination System
- CIWQS – California Integrated Water Quality System
- CERS – California Environmental Reporting System
- HWTS – Hazardous Waste Tracking System

These listings are typical for a distribution center and are related to normal operations, including storage of petroleum products, herbicides/pesticides, and other items that will be sent out for retail sale. No violations

were found associated with the distribution center. None of these activities listed above take place in limits of the Subject Property. Therefore, Kimley-Horn does not consider the activities listed to present a potential environmental risk to the Subject Property.

5.4.3 Adjoining and Nearby Sites

Kimley-Horn's review of the referenced databases also considered the potential or likelihood of contamination from adjoining and nearby facilities. To evaluate which of the adjoining and nearby facilities identified in the regulatory database report present an environmental risk to the Subject Property, Kimley-Horn considered the following criteria:

- The type of database on which the adjoining/nearby property is identified.
- The topographic position of the property relative to the Subject Property.
- The direction and distance of the identified facility from the Subject Property.
- Local soil conditions in the Subject Property area.
- The known and/or inferred groundwater flow direction in the Subject Property area.
- The status of the respective regulatory agency-required investigations and/or cleanup associated with the identified facility.
- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified facility and the Subject Property.

Only those facilities that are judged to present a potential environmental risk to the Subject Property and/or warrant additional clarification are further evaluated. Using the referenced criteria, and based upon a review of readily available information contained within the regulatory database report, Kimley-Horn did not identify adjoining (i.e., bordering) or nearby sites (e.g., properties within a ¼-mile radius) listed in the regulatory database report that were judged to present a potential environmental risk to the Subject Property.

5.5 OTHER ENVIRONMENTAL RECORDS

Kimley-Horn reviewed information from the following agencies:

- EPA's Enforcement & Compliance History Online (ECHO)
- EPA's NEPAAssist Database
- State Water Resources Control Board – Geotracker
- Department of Toxic Substances Control – EnviroStor

Kimley-Horn reviewed the U.S. EPA's Environmental Compliance History Online (ECHO) and NEPAAssist database for records of regulated facilities on and surrounding the Subject Property. The Lowe's Distribution Center was identified in the ECHO database. No violations were issued associated with this listing. Another listing associated with the Lowe's Distribution Center, "Lowe's Home Improvement Warehouse 966," was identified in the ECHO database. A violation was detected in Quarter 4 (July 1st to September 30, 2021). The violations occurred from August 25, 2021 to September 20, 2021 and were identified as Records/Reporting violation types. EDR noted multiple violations assessed against Lowe's for failure to maintain required documentation and/or minor housekeeping items. Kimley-Horn reviewed the data, and found violations were addressed in a timely manner and did not find any outstanding violations.

Furthermore, none of the reviewed violations related to the Subject Property, but instead related to the existing distribution center.

Kimley-Horn reviewed the State Water Resources Board GeoTracker (<https://geotracker.waterboards.ca.gov/>, accessed on July 20, 2023) database for records of regulated facilities on and surrounding the Subject Property. No cleanup or hazardous waste sites were identified on the Subject Property. The closest site listed on GeoTracker is a military cleanup site associated with the March Air Force Base (DOD100280300) located approximately ½ mile southwest of the Subject Property. The military cleanup site case has been completed and closed. Kimley-Horn also reviewed the Department of Toxic Substances Control EnviroStor (<https://www.envirostor.dtsc.ca.gov/public/>, accessed July 20, 2023) database for records of cleanup sites on and surrounding the Subject Property. No cleanup sites were identified on the Subject Property or within a ½ mile radius.

5.6 VAPOR EVALUATION

The ASTM E 1527-21 document standardizes the terms release and migration consistent with those used in CERCLA and AAI. As such, potentially harmful vapors must be evaluated during the completion of a Phase I ESA.

Kimley-Horn performed a Tier 1 Vapor Encroachment Screening (VES) in accordance with E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (2015) with the purpose of identifying if a Vapor Encroachment Condition (VEC) exists in association with the Subject Property. A VEC is defined as the presence or likely presence of contaminants of concern (COC) vapors in the subsurface of the Subject Property caused by a release of hazardous substances and/or petroleum compounds into soil and groundwater. Current and historical uses were evaluated within the Area of Concern (AOC) during the completion of the Tier 1 VES. As indicated in ASTM 2600-15, the radial distance of the AOC for non-petroleum hydrocarbon COCs (i.e., chlorinated VOCs) is 1/3-mile (1,760 ft.) and 1/10 mile (528 ft.) for petroleum hydrocarbons.

According to the reasonably ascertainable information reviewed during this screening process, Kimley-Horn has determined that a VEC is not likely to exist at this time (**Appendix K**).

The Tier I VES does not include vapor intrusion and/or indoor air quality considerations associated with existing and/or proposed structures. No vapor sampling was conducted in association with this VES and the Subject Property.

5.7 BUILDING DEPARTMENT/ASSESSOR'S DEPARTMENT INFORMATION

Kimley-Horn attempted to review reasonably ascertainable assessment information provided by the City of Perris – Building Department. The Building Department does not make records readily available online. However, Building Permit data was researched by EDR (**Appendix L**). EDR identified building permits associated with the Subject Property for the following years: 2011, 2013, 2015-2023. EDR also identified building permits associated with adjoining properties for the following years: 2007-2008, 2011-2023. All building permit data researched by EDR were sourced from the City of Perris – Development Services Division and the County of Riverside – Building and Safety Division. Permit records found were associated with fire and commercial permit types, including re-roofing, fire alarm and sprinkler systems, electrical improvements, HVAC, and commercial alterations associated with the Lowe's Distribution Center.

Kimley-Horn attempted to review reasonably ascertainable assessment information provided by the Riverside County Assessor's office. The Assessor's office makes property records available via an online property search (**Appendix M**). However, the Assessor's office does not make owner information and lien records readily available online. Kimley-Horn consulted with Parcel Quest, an online database of assessor's information. ParcelQuest identified the Subject Property's owner as Lowes H I W, Inc.

5.8 HEALTH DEPARTMENT

Kimley-Horn submitted an FOIA request to the Riverside County Environmental Health Department to review records for the Subject Property. Kimley-Horn did not receive a response within the time constraints of this report. If Kimley-Horn does receive a response, and it changes the findings of the report, the client will be notified.

5.9 THREATENED, ENDANGERED, AND OTHER PROTECTED SPECIES

Kimley-Horn reviewed the current U.S. Fish and Wildlife Endangered Species online viewer (<http://www.fws.gov/endangered/>). According to this source, there are no critical habitats or endangered species located on or near the Subject Property.

Kimley-Horn also consulted the California Natural Diversity Database (CNDDDB) web site (www.dfg.ca.gov) regarding potential ecological resources, threatened, or endangered species within the Perris, California 7.5-minute USGS topographic quadrangle. The results found 35 records of species within the Perris Quadrangle that have a Federal or State status. However, based on the CNDDDB aerial map of the Subject Property, no species occur within the vicinity of the Subject Property. Furthermore, although the Subject Property is vacant, the surrounding areas are developed. Due to development activity within the site vicinity, it is unlikely that any critical habitat supporting threatened, endangered, or other protected species would exist on the Subject Property. Ecological resources and endangered species are not suspected to be a business environmental risk for the Subject Property.

5.10 CULTURAL, HISTORIC, AND ARCHAEOLOGICAL RESOURCES

Review of reasonably ascertainable standard and other historical sources, and site observations, have not identified the presence of cultural, historic, or archeological resources on or near the Subject Property. Kimley-Horn reviewed the California State Parks Office of Historic Preservation Historical Resources and the National Register of Historic Places Information System. No sites of historical significance were identified on the Subject Property.

5.11 WETLANDS AND SURFACE WATERS

Kimley-Horn reviewed the U.S. Fish and Wildlife Service National Wetland Inventory (NWI) Map, which documented no regulated wetlands on the Subject Property. The nearest wetland is a freshwater wetland located approximately 0.75-mile north of the Subject Property, discussed in Table 5.2. Additionally, Kimley-Horn did not observe any potential wetlands on the Subject Property.

5.12 UTILITIES

The following is a concise summary of the utilities that service the Subject Property.

5.12.1 Municipal Water/Water Wells

According to the City of Perris website, accessed July 19, 2023, water service is provided to the Subject Property by the Eastern Municipal Water District. Kimley-Horn did not observe any wells during the Site Reconnaissance.

5.12.2 Sanitary Sewer/Septic System

According to the City of Perris website, accessed July 19, 2023, sanitary sewer service is provided to the Subject Property by the Eastern Municipal Water District. Kimley-Horn did not observe any evidence of septic tanks or leech fields during the Site Reconnaissance.

5.12.3 Heat Source

No documentation of fuel oil use was identified during review of reasonably ascertainable records, and no visual evidence of fuel oil use was identified during the site reconnaissance.

5.13 UNDERGROUND STORAGE TANK (UST) SYSTEMS

Review of reasonably ascertainable standard and other historical sources, and site observations, have not identified the current presence of USTs on the Subject Property. Specifically, no records of USTs were identified though review of reasonably ascertainable records and Kimley-Horn did not observe any evidence of USTs (i.e. fill ports, vent pipes, etc.) at the Subject Property during the site reconnaissance.

5.14 PRIOR REPORTS

Kimley-Horn prepared a Phase I ESA for the Subject Property in March 2021, a copy of which is available upon request. The previous Phase I noted the Subject Property as undeveloped land adjacent to a Lowe's Distribution Center built in the early 2000s. Kimley-Horn did not identify any RECs, HRECs, CRECs, or BERS associated with the Subject Property.

6. INTERVIEWS

The objective of completing interviews with knowledgeable Subject Property contacts is to obtain information about the uses and physical characteristics of the property. The following individuals were interviewed regarding the current and historical use of the Subject Property.

6.1 OWNER/OCCUPANT INTERVIEWS

The Subject Property is owned by Lowe's H I W, Inc. Kimley-Horn was able to interview Mr. Michael Banks, Maintenance Manager at the Lowe's Distribution Center. Mr. Banks has worked at the Perris facility for nine years. Mr. Banks is not aware of any spills, leaks, or breaches that resulted in a release of hazardous materials at the Distribution Center or within the Subject Property. According to Mr. Banks, the Subject Property is used to park empty trailers. No other goods or vehicles are stored within the Subject Property. Mr. Banks stated he was not aware of any instances of dumping at the Subject Property.

6.2 STATE AND/OR LOCAL AGENCY INQUIRES

Table 6.1 Summary of State and/or Local Agency Inquires

Kimley-Horn did not receive a response within the time constraints of this report. If Kimley-Horn does receive a response, and it changes the findings of the report, the client will be notified.

7. FINDINGS AND OPINIONS

The logic and reasoning used by the environmental professional in evaluating information collected during the course of the assessment related to findings shall be discussed. The opinions shall specifically include the environmental professional's rationale for concluding that a finding is or is not a recognized environmental condition, controlled recognized environmental condition, historical recognized environmental condition, or de minimis condition insofar as the findings pertain to each of these conditions.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 for the 12-acre property at 3984 Indian Avenue in Perris, Riverside County, California; the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

7.2 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECS)

A recognized environmental condition (REC) is defined in the ASTM Standard as the presence or likely presence of a hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. This assessment has/has not revealed evidence of recognized environmental conditions connected with the Subject Property.

7.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

A CREC is a recognized environmental condition that is being appropriately characterized and remediated in accord with, and under the supervision of, authorized governmental agency charged with oversight of such recognized environmental condition. This assessment has not revealed evidence of controlled recognized environmental conditions connected with the Subject Property.

7.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

A historical REC (HREC), as defined in the ASTM Standard, is a past release of any hazardous substance and/or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria. This assessment has not revealed evidence of historical recognized environmental conditions connected with the Subject Property.

7.5 BUSINESS ENVIRONMENTAL RISK

A Business Environmental Risk (BER), as defined in the ASTM Standard, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the use of a commercial site, and which does not require further investigation to the same degree as a REC. Kimley-Horn did not identify areas of potential concern associated with business environmental risks in connection with the Subject Property during the completion of this Phase I ESA.

(b) The insured shall notify the Company promptly in writing (i) in case any action or proceeding is begun or defense is interposed as set forth in (a) above, (ii) in case knowledge shall come to an insured hereunder of any claim of title or interest which is adverse to the title to the estate or interest, as insured, and which might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if title to the estate or interest, as insured, is rejected as unacceptable. CONDITIONS AND STIPULATIONS

(Continued from inside front cover)

6. DETERMINATION AND PAYMENT OF LOSS

(a) The liability of the Company under this policy shall in no case exceed the least of:

- (i) the actual loss of the insured claimant; or
- (ii) the amount of insurance stated in Schedule A.

(b) The Company will pay, in addition to any loss insured against by this policy, all costs imposed upon an insured in litigation carried on by the Company for such insured, and all costs, attorneys' fees and expenses in litigation carried on by such insured with the written authorization of the Company.

(c) When liability has been definitely fixed in accordance with the conditions of this policy, the loss or damage shall be payable within 30 days thereafter.

7. LIMITATION OF LIABILITY

No claim shall arise or be maintainable under this policy (a) if the Company, after having received notice of an alleged defect, lien or encumbrance insured against hereunder, by litigation or otherwise, removes such defect, lien or encumbrance or establishes the title, as insured, within a reasonable time after receipt of such notice; (b) in the event of litigation until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom, adverse to the title, as insured, as provided in paragraph 3 hereof; or (c) for liability voluntarily assumed by an insured in settling any claim or suit without prior written consent of the Company.

8. REDUCTION OF LIABILITY

All payments under this policy, except payments made for costs, attorneys' fees and expenses, shall reduce the amount of the insurance pro tanto. No payment shall be made without producing this policy for endorsement of such payment unless the policy be lost or destroyed, in which case proof of such loss or destruction shall be furnished to the satisfaction of the Company.

9. LIABILITY NONCUMULATIVE

It is expressly understood that the amount of insurance under this policy shall be reduced by any amount the Company may pay under any policy insuring either (a) a mortgage shown or referred to in Schedule B hereof which is a lien on the estate or interest covered by this policy, or (b) a mortgage hereafter executed by an insured which is a charge or lien on the estate or interest described or referred to in Schedule A, and the amount so paid shall be deemed a payment under this policy. The Company shall have the option to apply to the payment of any such mortgages any amount that otherwise would be payable hereunder to the insured owner of the estate or interest covered by this policy and the amount so paid shall be deemed a payment under this policy to said insured owner.

10. APPORTIONMENT

If the land described in Schedule C consists of two or more parcels which are not used as a single site, and a loss is established affecting one or more of said parcels but not all, the loss shall be computed and settled on a pro rata basis as if the amount of insurance under this policy was divided pro rata as to the value on Date of Policy of each separate parcel to the whole, exclusive of any improvements made subsequent to Date of Policy, unless a liability or value has otherwise been agreed upon as to each such parcel by the Company and the insured at the time of the issuance of this policy and shown by an express statement herein or by an endorsement attached hereto.

11. SUBROGATION UPON PAYMENT OR SETTLEMENT

Whenever the Company shall have settled a claim under this policy, all right of subrogation shall vest in the Company unaffected by any act of the insured claimant. The Company shall be subrogated to and be entitled to all rights and remedies which such insured claimant would have had against any person or property in respect to such claim had this policy not been issued, and if requested by the Company, such insured claimant shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect

such right of subrogation and shall permit the Company to use the name of such insured claimant in any transaction or litigation involving such rights or remedies. If the payment does not cover the loss of such insured claimant, the Company shall be subrogated to such rights and remedies in the proportion which said payment bears to the amount of said loss. If loss should result from any act of such insured claimant, such act shall not void this policy, but the Company, in that event, shall be required to pay only that part of any losses insured against hereunder which shall exceed the amount, if any, lost to the Company by reason of the impairment of the right of subrogation.

12. LIABILITY LIMITED TO THIS POLICY

This instrument together with all endorsements and other instruments, if any, attached hereto by the Company is the entire policy and contract between the insured and the Company.

Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the title to the estate or interest covered hereby or any action asserting such claim, shall be restricted to the provisions and conditions and stipulations of this policy.

No amendment of or endorsement to this policy can be made except by writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. NOTICES, WHERE SENT

All notices required to be given the Company and any statement in writing required to be furnished the Company shall be addressed to it at its main office at 114 E. Fifth Street, Santa Ana, California, or to the office which issued this policy.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Western Riverside Area, California

Survey Area Data: Version 15, Sep 6, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 14, 2022—Mar 17, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: On April 12 and 13, 2007, a Phase II assessment was completed for the sale of the property. 8 borings were drilled; 3 near the tank pit to 51.5 and 5 near the dispensers to 31.5 . Up to 2.2 ppm TPHg, 16 ppm TPHd, 4.5 ppm MTBE, and 1.3 ppm TBA were detected in the soil. The site was placed into the LOP program. Three groundwater monitoring wells were installed to 100 on July 16-19, 2007. The soil from well 1 had ND TPHg, BTEX and a high of 0.027 ppm MTBE. Soil from Well 2 had 0.9 ppm TPHg, ND BTEX, up to 2.8 ppm MTBE, 0.41 ppm TBA, 0.017 ppm TAME. Well 3 had up to 11 ppm TPHg, ND BTEX, up to 17 ppm MTBE, 0.89 ppm TBA, 0.062 ppm TAME. Highest concentrations were between 30-45 ft in the borings. GW encountered at approximately 80 ft bgs 3 SVE wells were installed November 12 and 13, 2007. Wells were drilled to 40 and screened from 25-40 . Up to 0.83 ppm TPHg, 7.8 ppm TPHd, 2 ppmv MTBE, 0.18 ppm TBA and 0.0084 ppm TAME was detected in the soil. Soil Vapor Extraction was conducted from June 26, 2008 to December 9, 2008 when the system was shut down for a successful rebound test. 44 lbs of TPHg and 37 lbs of MTBE were removed. Influent TPHg went from 41 ppmv to 2.1 ppmv. MTBE started at 47 ppmv and ended at 1.9 ppmv. Four confirmation borings were proposed; however CB-4 (to be drilled north of MW-3) could not be drilled due to pea gravel in the air-knifed hole and could not be relocated due to an electric transformer and power pole, tree, vent lines, and a water line in the area around the proposed boring location. On March 30 and 31, 2009, three borings were drilled to 85 and soil samples were taken every 5 beginning at 10 . TPHg was detected in one sample (CB-2 at 40) at 0.7 ppm. MTBE was detected in 6 samples from all three borings between 40-55 with a

maximum of 0.64 ppm. TBA was detected in one sample (CB-1 at 40) at 0.2 ppm. No BTEX, DIPE, ETBE, TAME or ethanol was detected. The groundwater was sampled quarterly from the third quarter 2007 until the first quarter 2009. No TPHg or BTEX was detected. All three wells had MTBE (2.2, 29 and 1.3 ppb) during the first sampling event but have been ND<1 ppb since. MW-1 had 24 ppb TBA during the second quarter of 2008. The consultant is requesting no further action be conducted at the site due to the minimal hydrocarbons remaining in the soil. Even though CB-4 could not be drilled, the ROI for the site is 31 , which encompasses the soil in the vicinity of MW-3. Additionally, groundwater analytical data of MW-3 indicates MTBE degraded from 1.3 ppb to ND<1 ppb and has not been detected since the third quarter 2007. Access of the alley to the north of the site was investigated in order to relocate CB-4. The alley is shared with 8 parcels of land and would require a city issued encroachment permit and notification of all the property owners. The alley is trafficked by large trucks and due to a power pole located near the alley, overhead obstructions would require the entire alley be blocked for further soil investigations. Subsurface Soil types: fine to coarse grained sands, silty sand, sandy silt and silt Depth to GW: 80.52 ft bgs to 83.09 ft bgs Current Depth To GW: 80.52 GW Flow: southwest Remediation: soil vapor extraction Sensitive Receptors: one active public well located 2212 northeast of site Other information: UST system currently installed and operating at the site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official

Permit Content Definitions

- Permit Number: The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.
