Subject: Perris Airport environmental study and safety

Good morning, Mr Perez.

My name is Jeffrey Boddiger.

I frequently travel to and skydive at the Perris Airport. I have done so on a regular basis since 1993.

I have always felt this is a very safe place to skydive and enjoy this sport with friends landing on the airport.

Recently I have learned that the City of Perris is considering granting permission for a building on or near the Perris Airport which will affect negatively safety of landing under parachute on the airport.

I ask that building permission to Not be granted. Let it be built somewhere else where it will not affect safety of aviation and the sport of skydiving.

I thank you for your time and consideration in this matter.

Jeffrey Boddiger
