---

Good afternoon, I wanted to send this email to show support for all the safety and environmental concerns for the proposed building next to the airport. The main concern is the turbulence coming off the buildings from the wind that will greatly affect planes landing on the runway and also skydivers that land in the North Landing area. The water runoff and bird attraction from the holding ponds they want to build is another great concern. Please take all the public comments and concerns very seriously. This airport means a lot to the people of the community, the people that work there and their families.
