

## Personal Statement

Commissioners, Staff, my name is Nick Collura. I made my first jump at Perris in July of 1979 and have been coming to the Perris Airport since 1977. I am a Licensed General Contractor and I have major Safety concerns over such a large project. If built as proposed, the sheer size and complexity will definitely have a major impact on safety. The project is very close to the public runway and parachute landing areas and I believe the wind being diverted around these structures will not be good. Not good for people in airplanes landing and taking off and not good for people landing under parachutes. I have seen firsthand what can happen when low level wing turbulence is encountered with airplanes and parachutes...not good. I would like to go on record in opposition to the project for the public's safety. Thank you for your time.

Nicholas Collura
