Subject: Community Concerns for Perris Valley Airport
Date: Thursday, November 9, 2023 8:49:37 AM

Dear Mr. Perez,

I trust this email finds you well. I am writing to express my deep concern regarding the potential negative impact on Perris Valley Airport and the surrounding community due to the proposed development by big-dollar investors.

I have recently been informed about the ambitious plans to build enormous warehouses on the west side of the airport, accompanied by a significant increase in semi-truck traffic. The implications of such a development, including the potential for dangerous turbulence under specific wind conditions, raise serious concerns for both the airport's safety and the well-being of the local community.

While I understand that this is a substantial project that may take years to complete, I recognize the urgency to collect community input emphasized in your recent communication. The current battle to preserve Perris Valley Airport is crucial, and I am committed to contributing to the positive influence on the situation.

In response to your call for community input, I have taken the time to sign both petitions and am reaching out to you directly with my concerns. I believe it is vital to address this issue promptly and collaboratively to protect the airport and its surrounding community.

Thank you for your continued efforts in keeping the community informed. I appreciate the City of Perris's supportive stance toward the airport, and I trust that our collective voices will make a difference.

Best regards,

Jim Dinning
