Subject: Community Concerns for Perris Valley Airport
Date: Tuesday, November 14, 2023 9:59:58 AM

Hi!

I read that investors are trying to develop the land west of the Perris Airport.

This could have a big impact on the safety of skydivers. Buildings can cause a lot of turbulence for skydivers under canopy. Turbulence cause accidents. The closer and taller the buildings are, the worse it is. If this development of the west side evolves, it will have a large impact on the skydiving community. A lot of the bigger skydiving events will be moved elsewhere because of safety. Skydive Perris is a fantastic place, and they take safety really seriously!

Also, recreational areas are important too. Everything can't be all work, you need some fun and activities in your life!

Have you ever skydived? If not, you should definitely try. It is lifechanging. Its a very "in the moment" feeling. Every other thought in your head is gone. You feel very much alive.

Have a Merry Christmas.

Love from Norway.
