Subject: Proposed development near Perris Valley Skydiving
Date: Friday, October 27, 2023 5:20:26 PM

Good day. As a person who had been coming to Perris Valley Skydiving for over 20 years , I have concerns about the proposed truck and trailer storage facilities being proposed at the north end of the Perris Valley Airport Runway.

Perris has seen tremendous growth in recent years and a lot of it had been positive. But this proposed project may affect the synergy by proposing a threat to the safety of Skydivers and aircraft from the effects of wind and turbulence. Its close proximity to the runway is very likely to affect smaller aircraft and parachutes. Given the wide range of aircraft, skydiving skill levels and the amount of people we have using this facility we have much cause for concern.

If this airport is forced to shutdown in the name of safety it would be an enormous loss to the skydiving community; the general aviation community; and the city of Perris. Local commerce would decrease. Tax revenue would decrease. Many studies over the years have proven that airports are an economic multiplier to their community. As someone who has used the airport for over 20 years I would like to keep it open and safe.
