Subject: Community Concerns for Perris Valley Airport

Nathan Perez,

I am writing to express my concerns regarding development of the land adjacent to the Perris airport. This would negatively impact flying and skydiving operations due to turbulence caused by structures built close to the landing areas. Skydive Perris has been in operation at the Perris airport for many decades and has not only provided many employment opportunities to local residents over this time but has also brought an enormous amount of revenue to local businesses through the influx of skydivers, from all over the world.

As someone who was employed by Skydive Perris for almost two decades, I urge you to block the development of the land West of the airport so that others can enjoy the continued use of the airport for many years to come and it can continue to bring revenue to the local businesses in the town.

Regards,
Sharon Kindsvater
