Subject: Community concerns for Perris Valley Airport
Date: Tuesday, November 14, 2023 7:26:29 PM

I'm emailing in regards to the proposed development at the Perris airport. I'm very surprised that the city is considering the large development in regards to the proposed warehouses next to the airport. I strongly feel that the city needs to seriously consider the concerns and objections raised by Skydive Perris. This is a business that has put Perris on the map. They have brought in tens of millions of dollars to the city of Perris over many years of operation at the airport. I myself have spent well over \$25,000 in just hotels, restaurants, groceries, gas, car rentals etc. between 2011-2019. That's just myself. Thousands of visitors come to this business every year from all over the world. If it weren't for this business, your international reputation would cease to exist. I feel that this business should have a major say in what goes on at that airport for the simple reason is that they put Perris on the world map. If the proposed warehouses go ahead, it may be too dangerous to host big international events thus halting huge amounts of money into the city.

Why don't they build those warehouses at another location? The city should promote smaller size commercial business that won't affect the safety of the Skydive Perris. It would benefit all involved.

I hope you seriously listen to Skydive Perris. They've done a great deal for the city of Perris.

Thank you
