Hi Nathan Perez.

Susana Gonzalez and family here reaching out in regards to the plan of building more warehouse.

Do we really need more? Cover the left over land we still can enjoy? There are way too many now newly built and not even being used. Allot of companies are moving out of California already do inflation..why add to it and not only that more pollution.

I bought 4 yrs ago and with my surprise could not share my thoughts of whs being built across the street from us. The majority of.our neighbors are retired. They want piece... the traffic of trailers day in and day out .no care for the community. WHY keep building and around our HOMES. It's not like we can just pick up and move! My neighbor have been here for over 20 yrs.. Mead Valley and Perris areas we want to for but not with walls covering us.. STOP the building.. Mead VALLEY a warehouse approved between 2 homes???

What morals do you elects have? Respect our community... listen to our needs not your pockets.

Enough is enough...

Familia trying to enjoy our life..how can we with all the congestion of warehouses.
