Subject: IMPACT OF PROPOSED BUILDINGS NEAR PERRIS AIRPORT
Date: Friday, October 27, 2023 11:37:41 AM

Good Day, Mr. Perez,

I am sure that you have received letters from others who have outlined technical concerns for how the proposed project above will negatively impact the airport operations. But I want you, and all others concerned, to also know how this will impact skydivers like me and my family and friends.

I am an active 92-year-old skydiver who made my first jump in the 1960's. I have been skydiving at the Perris Airport for well over 50-years. My children have jumped there; my grand-children have jumped there. My closest friends are fellow skydivers who meet there regularly.

I have seen the airport thrive since being acquired, improved, and operated by the Conatser family. If the operation becomes unsafe due to this project, all of the above will change.

I implore you to seriously consider all of the above when making decisions that could possibly end the operations of one of the most popular destinations for thousands of my friends and family throughout the years.

Sincerely,
Patrick (Pat) Moorehead
