---

To whom it may concern,

I hope this email finds you well, my name is John Perry, I am writing to voice my concerns for future development plans that would affect the Perris Airport. While I am not a resident of Perris or even Riverside county, I am a pilot, and frequent many flights to the local area. On behalf of aviators as well as the skydiving community, I implore you to hear from local constituents and reconsider the developments that would make the airport more hazardous to fly around. Large structural developments close to the airport can cause turbulent conditions on the runway, creating a dangerous situation for all pilots. It is in this instance that I again ask you to not only reconsider, but hear from your community, as well as prominent, longstanding business Skydive Perris, and perhaps even dismiss the developments all together. Thank you for your time.

Best

John Perry
