**Subject:** Perris Valley Airport MUST Survive

Dear City Council:

As a lifelong resident of Southern California, I have been visiting the City of Perris consistently for over 50 years. I have frequented your motels, gas stations, and restaurants, and I happily contribute to the local economy. The only reason I have been so attracted to Perris is because of the airport. Perris Vally Airport has been a unique advantage that your town has benefitted from for decades. I and hundreds, nay thousands, of visitors, all come to Perris to spend money, to enrich the local economy, and it is all because of the jewel that is Perris Valley Airport,

I therefore object to the proposed construction in the vicinity of the airport. This urban sprawl would have a devastating effect on the safety of the airport operations, and it would likewise have a devastating effect on the economy of the City of Perris. This would result in killing the golden goose that has laid the golden-egg lifeline to Perris for decades.

Please do the right thing for the long term and decline the warehouse proposal for the north end of the airport property. Saving the Perris Valley Airport means saving the economy of the City of Perris.

Sincerely,

Jerry Swovelin
