Subject: Save Skydive Perris
Date: Monday, October 30, 2023 2:18:25 PM

To whom it may concern,

Skydive Perris is much more than a skydiving drop zone. It is a home to many and an iconic and historical site with meaning beyond its boundaries. Not only has Skydive Perris provided a place for people across the WORLD to gather and enjoy the sport of skydiving, it is a community center that builds, strengthens, and maintains the bond of local residents as much as visitors from all walks of life.

I myself am a skydiver who got licensed and currently jumps at skydive Perris and I share and voice the opinion of thousands of skydivers who call Skydive Perris "Home". The construction of this project would be devastating not only to the dropzone itself, but to thousand of people who enjoy the many amenities of skydive Perris. It would inevitably have a negative impact in the local economy and would devastate the drop zone beyond salvaging. This would create potentially catastrophic wind hazards which could potentially cause severe injury and loss of life to many skydivers.

Please find it in your hearts to cease and desist from moving forward with this project and find an alternate location. Keep in mind the thousands of people's lives you could be negatively affecting and ruining a hard working, honest, community centered business and leaving hundreds without jobs in addition of depriving thousands of skydivers from safely partaking in this sport.

Sincerely,

-Augusto Zapata
