Re: Howard Industries Harvest Landing Project

Dear Chairman Hammond and Commissioners,

On behalf of the Perris Valley Historical Museum, I am writing to request your recommendation in support of the Harvest Landing project.

Harvest Landing has demonstrated a commitment to partnering with our Historical Museum to ensure that meaningful historical preservation is integrated into its design. The project's planned public art program, developed in coordination with the museum will thoughtfully highlight Perris' heritage and honor the rich history that defines our community. They took the time to show our Museum Board another project they had done implementing historic art that was very impressive.

While growth is an essential part of a thriving city like Perris, it should remain rooted in our historical identity and shared values. We commend the Harvest Landing team for their dedication to supporting our mission to preserve Perris' heritage and share it with future generations.

Furthermore, the project's outdoor amenities and community focused design will provide much needed recreational spaces for Perris families and visitors to enjoy while learning its history.

We are proud to support this project and kindly request your recommendation in support. Thank you for your consideration.

Sincerely,

Steve Stenlake
President
Perris Valley Historical Museum
